

Call for participation to the "EURO Summer/Winter Institute (ESWI) on Lot Sizing",  
application deadline Friday, 14th February

Dear all,

The EURO Winter/Summer Institute on Lot Sizing will be held at the Ecole des Mines Saint-Etienne in Gardanne (Provence, France) between April 14 and April 25, 2025 (see <https://eswi2025-lot.sciencesconf.org/>). The institute focuses on all aspects of lot sizing and covers recent advances in lot sizing and related topics. The main purpose of an EWSI is to establish a network of outstanding people who will continue to work together in the future.

Applicants must be either PhD students or have less than two years of research experience since completing a PhD. All participants should have an unpublished paper, and will present their material, discuss it with others and with a handful of specially invited senior experts in the field, and finally prepare a paper to be considered for inclusion in a feature issue of an OR publication.

More details can be found on <https://eswi2025-lot.sciencesconf.org/>.

Please, feel free to contact Stéphane Dauzère-Pérès ([dauzere-peres@emse.fr](mailto:dauzere-peres@emse.fr)) for any further questions.
